WisdomTree Announces Fourth Quarter 2020 Results – Diluted Loss Per Share of (\$0.10), or Earnings Per Share of \$0.06, as adjusted

New York, NY – (GlobeNewswire) – January 29, 2021 – WisdomTree Investments, Inc. (NASDAQ: WETF) today reported financial results for the fourth quarter of 2020.

(\$13.5) million net loss (\$9.21 million net income, as adjusted), see “Non-GAAP Financial Measurements” for additional information.

\$22.4 million of non-cash charges, associated with the revaluation of deferred consideration – gold payments.

\$67.4 billion of ending AUM, an increase of 11.0% arising from market appreciation and net inflows.

\$881 million of net inflows, driven by inflows into our emerging markets equity and U.S. equity products, partly offset by outflows from our fixed income, commodity, international developed market equity and leveraged & inverse products.

0.41% average global advisory fee, a decrease of 1 basis point due to AUM mix shift.

\$67.1 million of operating revenues, an increase of 3.7% primarily due to higher average AUM, partly offset by a lower average global advisory fee.

75.6% gross margin¹, a 0.9 point decrease primarily due to Brexit and fund rebalancing costs.

19.2% operating income margin, a 3.6 point decrease primarily due to higher operating expenses, partly offset by higher revenues.

\$0.03 quarterly dividend declared, payable on February 24, 2021 to stockholders of record as of the close of business on February 10, 2021.

Update from Jonathan Steinberg, WisdomTree CEO

“Our business has more than navigated the global pandemic, we have emerged stronger. Not only have we adapted to the remote working environment without missing a beat, but we also gleaned new operating efficiencies and competitive strengths that represent real value for shareholders. These strengths include: Our leading European-listed Bitcoin ETP approaching an inflection point; the building of a profitable, fast-growing and complementary UCITS platform; and the achievement of true diversification, powered by a leadership position in gold.

“We ended the year with momentum which we are carrying into the new year. Our digital assets initiatives reinforce and expand upon our core business strengths, as WisdomTree is aggressively pursuing and is well-positioned for success in this growing space. In 2020, we set our strategy for these initiatives, and we have been designing workflows and engaging productively with regulators with a goal of launching products later this year.”

“I am very excited about our business. We ended 2020 with strong growth and momentum. That momentum is continuing in 2021, and we are well positioned and have a strong 2021 growth plan. To date, we have seen global organic growth of \$630 million and now have global assets under management at a new record, just shy of \$70 billion.

“For 2021, with our dividend strategies, our leadership position in gold and commodities, our best-in-market crypto ETP offering, our cloud computing, AI and battery products, recent global cybersecurity launch, as well as our leading ESG offerings, we could not be better positioned.

“Lastly, remote working has worked for us. We have transformed our operating model and we are working as a global team better than ever before. With a fresh perspective we have found new efficiencies adding scalability to our model and giving us scope to make further investments in future growth. Our vision is to continue with a remote-first approach post pandemic, ensuring that these efficiencies are permanent and carried into future years.”

QUARTERLY HIGHLIGHTS

Operating Revenues

- Operating revenues increased 3.7% from the third quarter of 2020 due to higher average global AUM arising from market appreciation and net inflows, partly offset by a 1 basis point decrease in our average global advisory fee due to AUM mix shift.
- Operating revenues decreased 2.7% from the fourth quarter of 2019 due to a 3 basis point decline in our average global advisory fee arising from AUM mix shift, notwithstanding the increase in our average AUM.
- Our average global advisory fee was 0.41%, 0.42% and 0.44% during the fourth quarter of 2020, the third quarter of 2020 and the fourth quarter of 2019, respectively.

Operating Expenses

- Operating expenses increased 8.5% from the third quarter of 2020 due to higher incentive compensation, higher fund management and administration costs arising from Brexit and fund rebalances, as well as higher marketing expenses and professional fees.
- Operating expenses were essentially unchanged from the fourth quarter of 2019.

Other Income/(Expenses)

- We recognized a non-cash loss on revaluation of deferred consideration of (\$22.4) million, (\$8.9) million and (\$5.4) million during the fourth quarter of 2020, third quarter of 2020 and fourth quarter of 2019, respectively. The loss in the fourth quarter of 2020 arose primarily from a reduction in the discount rate used to compute the present value of the annual payment obligations. The prior quarter losses arose due to an increase in forward-looking gold prices. The magnitude of any gain or loss recognized is highly correlated to the magnitude of the change in the forward-looking price of gold.
- Interest expense increased 7.3% from the third quarter of 2020 to \$2.7 million primarily due to higher levels of debt outstanding. This expense increased 3.4% from the fourth quarter of 2019 due to a higher effective interest rate, partly offset by lower levels of debt outstanding.
- Other gains and losses, net, were \$0.5 million, \$0.7 million and \$0.0 million for the fourth quarter of 2020, third quarter of 2020 and fourth quarter of 2019, respectively. The third quarter of 2020 includes a gain of \$0.2 million from the exit of our investment in AdvisorEngine Inc. Gains and losses also generally arise from the sale of gold earned from management fees paid by our physically-backed gold ETPs, foreign exchange fluctuations, securities owned and other miscellaneous items.

Income Taxes

- Our effective income tax rate for the fourth quarter of 2020 of negative 19.5% resulted in income tax expense of \$2.2 million. Our tax rate differs from the federal statutory tax rate of 21% primarily due to a non-deductible loss on revaluation of deferred consideration, partly offset by a lower tax rate on foreign earnings.
- Our adjusted effective income tax rate was 19.8%¹.

ANNUAL HIGHLIGHTS

- Operating revenues decreased 5.5% as compared to 2019 due to a 4 basis point decline in our average global advisory fee arising from AUM mix shift, notwithstanding the increase in our average AUM.
- Operating expenses decreased 7.6% as compared to 2019 due to lower incentive compensation accruals as well as \$3.5 million of severance expense included in the prior year, lower sales and business development costs, third party distribution costs, marketing expenses and other expenses, as well as lower fund management and administration costs primarily due to the sale of our Canadian ETF business. These declines were partly offset by higher contractual gold payments due to higher average gold prices.
- Significant changes in items reported in other income/(expenses) include a decrease in interest expense of 14.0% due to a lower level of debt outstanding; non-cash losses on revaluation of deferred consideration of (\$56.8) million and (\$11.3) million in 2020 and 2019, respectively; a decrease in interest income of 77.7% as the prior year included accrued paid-in-kind interest income on our former AdvisorEngine investment; non-cash impairment charges of \$22.8 million and \$30.7 million recorded in 2020 and 2019, respectively; a loss on extinguishment of debt of \$2.4 million in 2020; non-cash charges of \$6.0 million and \$4.3 million in 2020 and 2019, respectively, arising from the release of tax-related indemnification assets upon the expiration of the statute of limitations (an equal and offsetting benefit was recognized in income tax expense); and a gain of \$1.1 million in 2020 arising from an adjustment to the estimated fair value of consideration received from the exit of our investment in AdvisorEngine.

- Our effective income tax rate for 2020 of negative 1.2% resulted in income tax expense of \$0.4 million. Our tax rate differs from the federal statutory rate of 21% primarily due to a non-deductible loss on revaluation of deferred consideration, a valuation allowance on capital losses and tax shortfalls associated with the vesting and exercise of stock-based compensation awards. These items were partly offset by a tax benefit of \$6.0 million recognized in connection with the release of the tax-related indemnification asset described above, a \$2.9 million non-taxable gain recognized upon sale of our Canadian ETF business in the first quarter, a tax benefit of \$2.6 million recognized in connection with the release of a deferred tax asset valuation allowance on interest carryforwards arising from our debt previously held in the United Kingdom and a lower tax rate on foreign earnings.

Non-GAAP Financial Measurements

In an effort to provide additional information regarding our results as determined by GAAP, we also disclose certain non-GAAP information which we believe provides useful and meaningful information. Our management reviews these non-GAAP financial measurements when evaluating our financial performance and results of operations; therefore, we believe it is useful to provide information with respect to these non-GAAP measurements so as to share this perspective of management. Non-GAAP measurements do not have any standardized meaning, do not replace nor are superior to GAAP financial measurements and are unlikely to be comparable to similar measures presented by other companies. These non-GAAP financial measurements should be considered in the context with our GAAP results. The non-GAAP financial measurements contained in this press release include:

- *Adjusted operating income, operating expenses, income before income taxes, income tax expense, net income and diluted earnings per share.* We disclose adjusted operating income, operating expenses, income before income taxes, income tax expense, net income and diluted earnings per share as non-GAAP financial measurements in order to report our results exclusive of items that are non-recurring or not core to our operating business. We believe presenting these non-GAAP financial measures provides investors with a consistent way to analyze our performance. These non-GAAP financial measures exclude the following:
 - *Unrealized gains or losses on the revaluation of deferred consideration:* Deferred consideration is an obligation we assumed in connection with the ETFs acquisition that is carried at fair value. This item represents the present value of an obligation to pay fixed ounces of gold into perpetuity and is measured using forward-looking gold prices. Changes in the forward-looking price of gold and changes in the discount rate used to compute the present value of the annual payment obligations may have a material impact on the carrying value of the deferred consideration and our reported financial results. We exclude this item when calculating our non-GAAP financial measurements as it is not core to our operating business. The item is not adjusted for income taxes as the obligation was assumed by a wholly-owned subsidiary of ours that is based in Jersey, a jurisdiction where we are subject to a zero percent tax rate.
 - *Tax shortfalls and windfalls upon vesting and exercise of stock-based compensation awards:* GAAP requires the recognition of tax windfalls and shortfalls within income tax expense. These items arise upon the vesting and exercise of stock-based compensation awards and the magnitude is directly correlated to the number of awards vesting/exercised as well as the difference between the price of our stock on the date the award was granted and the date the award vested or was exercised. We exclude these items when calculating our non-GAAP financial measurements as they introduce volatility in earnings and are not core to our operating business.
 - *Interest expense from the amortization of discount arising from the bifurcation of the conversion option embedded in the convertible notes:* GAAP requires convertible instruments to be separated into their liability and equity components by allocating the issuance proceeds to each of these components. The liability component for convertible instruments that qualify for a derivative scope exception (applicable to our convertible notes) is allocated proceeds equal to the estimated fair value of similar debt without the conversion option. The difference between the gross proceeds received from the issuance of the convertible instrument and the proceeds allocated to the liability component represents the residual amount that is classified in equity. The discount arising from the recognition of the residual amount classified in equity is amortized as interest expense over the life of the instrument. We exclude this item when calculating our non-GAAP financial measurements as it is non-cash and distorts our actual cost of borrowing. In addition, in August 2020, the FASB issued Accounting Standards Update 2020-06, *Debt – Debt with Conversion and Other Options, Cash Conversion* which includes the elimination of the requirement to bifurcate conversion options qualifying for a derivative scope exception. Once effective, this interest expense will no longer be recognized.
 - *Other items:* Loss on extinguishment of debt, the release of a deferred tax asset valuation allowance recognized on interest carryforwards arising from our debt previously outstanding in the United Kingdom, a gain arising from an adjustment to the estimated fair value of consideration received from the exit of our investment in AdvisorEngine, impairment charges, a gain recognized upon sale of our Canadian ETF business and acquisition and disposition-related costs are excluded when calculating our non-GAAP financial measurements.
- *Adjusted effective income tax rate.* We disclose our adjusted effective income tax rate as a non-GAAP financial measurement in order to report our effective income tax rate exclusive of items that are non-recurring or not core to our operating business. We believe reporting our adjusted effective income tax rate provides investors with a consistent way to analyze our income taxes. Our adjusted effective income tax rate is calculated by dividing adjusted income tax expense by adjusted income before income taxes. See above for information regarding the items that are excluded.
- *Gross margin and gross margin percentage.* We disclose our gross margin and gross margin percentage as non-GAAP financial measurements because we believe they provide investors with a consistent way to analyze the amount we retain after paying third-party service providers to operate our ETPs. These measures also assist us in analyzing the profitability of our products. We define gross margin as total operating revenues less fund management and administration expenses. Gross margin percentage is calculated as gross margin divided by total operating revenues.
- *Adjusted operating income margin.* We disclose adjusted operating income margin as a non-GAAP financial measurement in order to report our operating income margin exclusive of items that are non-recurring or not core to our operating business.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking statements that are based on our management's beliefs and assumptions and on information currently available to our management. Although we believe that the expectations reflected in these forward-looking statements are reasonable, these statements relate to future events or our future financial performance, and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expects," "intends," "plans," "anticipates," "believes," "estimates," "predicts," "potential," "continue" or the negative of these terms or other comparable terminology. These statements are only predictions. You should not place undue reliance on forward-looking statements because they involve known and unknown risks, uncertainties and other factors, which are, in some cases, beyond our control and which could materially affect results. Factors that may cause actual results to differ materially from current expectations include, among other things, the risks described below. If one or more of these or other risks or uncertainties occur, or if our underlying assumptions prove to be incorrect, actual events or results may vary significantly from those implied or projected by the forward-looking statements. No forward-looking statement is a guarantee of future performance. You should read this press release completely and with the understanding that our actual future results may be materially different from any future results expressed or implied by these forward-looking statements.

In particular, forward-looking statements in this press release may include statements about

- the ultimate duration of the COVID-19 pandemic and its short-term and long-term impact on our business and the global economy;
- anticipated trends, conditions and investor sentiment in the global markets and ETPs;
- anticipated levels of inflows into and outflows out of our ETPs;
- our ability to deliver favorable rates of return to investors;
- competition in our business;
- our ability to develop new products and services;
- our ability to maintain current vendors or find new vendors to provide services to us at favorable costs;
- our ability to successfully operate and expand our business in non-U.S. markets; and
- the effect of laws and regulations that apply to our business.

Our business is subject to many risks and uncertainties, including without limitation:

- declining prices of securities, gold and other precious metals and other commodities can adversely affect our business by reducing the market value of the assets we manage or causing WisdomTree ETP investors to sell their fund shares and trigger redemptions;
- fluctuations in the amount and mix of our AUM, whether caused by disruptions in the financial markets or otherwise, including but not limited to a pandemic event such as COVID-19, may negatively impact revenues and operating margins, and may impede our ability to refinance our debt upon maturity, increase the cost of borrowing or result in our debt being called prior to maturity;
- competitive pressures could reduce revenues and profit margins;
- we derive a substantial portion of our revenues from a limited number of products, and as a result, our operating results are particularly exposed to investor sentiment toward investing in the products' strategies and our ability to maintain the AUM of these products, as well as the performance of these products and market-specific and political and economic risk;
- a significant portion of our AUM is held in products with exposure to U.S. and international developed markets and we therefore have exposure to domestic and foreign market conditions and are subject to currency exchange rate risks;
- withdrawals or broad changes in investments in our ETPs by investors with significant positions may negatively impact revenues and operating margins;
- over the last few years, we have expanded our business globally. This expansion subjects us to increased operational, regulatory, financial and other risks;
- many of our ETPs have a limited track record, and poor investment performance could cause our revenues to decline; and
- we depend on third parties to provide many critical services to operate our business and our ETPs. The failure of key vendors to adequately provide such services could materially affect our operating business and harm WisdomTree ETP investors.

Other factors, such as general economic conditions, including currency exchange rate fluctuations, also may have an effect on the results of our operations. For a more complete description of the risks noted above and other risks that could cause our actual results to differ from our current expectations, see "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2019 and Quarterly Reports on Form 10-Q for the quarters ended March 31, 2020 and June 30, 2020.

The forward-looking statements in this press release represent our views as of the date of this press release. We anticipate that subsequent events and developments may cause our views to change. However, while we may elect to update these forward-looking statements at some point in the future, we have no current intention of doing so except to the extent required by applicable law. Therefore, these forward-looking statements do not represent our views as of any date other than the date of this press release.
